

# Pure Soap Bar

## Naturally Gentle

### Free of Fragrance, Injurious Additives, GMOs, and SLS

**Pure Soap Bar** is pure vegetable soap saponified from a signature blend of pure Minnesota soybean oil and fair traded Malaysian coconut oil. It is the mildest of soaps that is free of injurious bleaches, dyes, chemicals, enzymes, GMOs, perfumes, phosphates, or sulfates. Safe for babies, pets, and people with sensitive skin and senses. Perfect to hand-wash delicate fabrics, lingerie, specially treated micro-fibers, waterproof sports and outdoor clothing. Shave the Pure Soap Bar and use alone or mixed with baking soda, borax, or washing soda to make **Green** formulas for all your cleaning, laundry, and washing.

### Bathing

- Pure Soap Bars are perfect for babies, pets, sensitive skin and senses.
- Pure Soap Bars are wonderful for everyday bathing and hand washing.
- Pure Soap Bars can be used as a natural conditioning shampoo with a vinegar rinse.

### Cleaning

- Bundle a Pure Soap Bar in a terrycloth to wash cars, dishes, tables, and walls.
- Use a Pure Soap Bar on delicate fabrics and surfaces.
- Shave a Pure Soap Bar and mix with baking soda, borax, and washing soda for **Green Cleaning**.

### Laundry

- Use a Pure Soap Bar to spot clean anything even wool carpet.
- Pure Soap Bars are perfect to hand-wash delicate fabrics and natural fibers.
- Shave a Pure Soap Bar to launder delicate items for extra care and softness.

## A Little Goes a Long Way!

**Green Cleaning :** Ingredients for green/traditional cleaning are Pure Soap Flakes, baking soda, borax, hydrogen peroxide, washing soda, and vinegar.

They can be used alone or in combination for a more specific and gregarious cleaning mixture, one that is environmentally friendly and free of toxins.

**Pure Soap Flakes :** (soap) molecules which attract dirt and grease on one end and are water soluble on the other end, forcing dirt out.

**Baking Soda :** (sodium bicarbonate), when carbon dioxide reacts with water and is neutralized to sodium salt. Perfect for deodorizing, softening, scouring.

**Borax :** (hydrated sodium borate) primarily sodium and boron, a naturally occurring mineral. Can be used for cleaning, deodorizing, softening, and whitening.

**Hydrogen Peroxide :** (H2O2) a naturally produced weak acidic liquid with strong oxidizing properties. A bleaching agent, disinfectant, and antiseptic.

**Vinegar :** (acetic acid) a sour liquid produced from fermentation yielding acetic acid. It's the acid in vinegar that cuts through grease and kills germs, mold, and mildew.

**Washing Soda :** (sodium carbonate) a powder related to baking soda. It cuts through grease, softens water, de-scales, and neutralizes.

\* Be a good steward of Earth at all times. When used outdoors be respectful of soil and water pH levels. Always rinse thoroughly.
